Re: ETO Scrubber

On behalf of Sheba hospital we would like to express our deep appreciation to your company's assistance and cooperation in purchasing and installing our ETO gas abatement system.

We were impressed with your friendly welcome and efficiently organized training visit to your Corunna plant, and the meetings at the two hospitals, who use similar abatement systems for many years.

In particular, we would like to thank Mr. Gene Rench, who was very resourceful in the installation and commissioning process at our site. His technical skills, and field experience combined with sense of humor, contributed to a complete success on time of this difficult task, to our great satisfaction.

Please send the "as made" drawings and other technical material as corrected during commissioning.

Sincerely yours,

Moshe Sidi , Boris Gurvich
